

Dear GEAA members,

We need clean, empty two liter soda bottles, lots of them, to make model aquifers for kids' summer programs. This summer Elena will be presenting workshops to the Children's Shelter, San Antonio Parks and Wildlife summer program, and others.

Please drop bottles off during office hours (9 to 5, M-F) at 1809 Blanco in San Antonio at your earliest convenience. The more bottles we get, the more children we can engage in learning how our wonderful karst aquifer works.

For more information about our education programs, click [here](#).

Thank you so much for your help and support.

Annalisa Peace
Executive Director
